"6 months ago I came into contact with a Dr who had died in the year 2070; he ate mango meat and quoted a poem by Parsifal. We spoke on the metaphysics of exchanging time with space over goat cheese, sweet potatoes and super malt. I enquired about the plotline of the final episode of Hollyoaks.

He had questions of music.

I answered with The OBBA SUPA.

He nodded and disappeared Behind him he left a paper explaining the relation between the vibrational frequencies of midnight and the correlation of it with a Greek record by Mapineaa. Knowing nothing of the intricate art of vibration manipulation, I passed on the mathematics and the record to The OBBA SUPA. 29 hours later I received this.

Extract taken from the life and times of the entity called you.
