EUROPE TOUR 2009

4TH - 13RD OF DECEMBER

In December this year, the Project: Mooncircle and Equinox Records labels present a tour with five great artists: John Robinson (aka Lil Sci of Scienz of Life), 2econd Class Citizen, Gordon, Buddy Peace & V.Raeter. While each of them deserve tours of their own, they will proudly travel together forming a superlative line-up for fans of indie hip hop and instrumental hip hop alike.

The 'Music Stays True Tour' celebrates the release of 3 brand new albums: Rap artist John Robinson (US) presents his 'Hip-Hop Motivation' EP on Project: Mooncircle. Breakbeat producer 2econd Class Citizen (UK) will perform tracks from his new album 'A World Without' on Equinox Records, and Buddy Peace (UK), signed to US label Strange Famous, will showcase tracks from his new album release 'Late Model Sedan' as a live DJ/production blend.

Last but not least, one of Berlins finest DJs, V.Raeter (of Spoken View) will provide you with music before and after the sets and will be supporting John Robinson during his show. The Artwork Designer Gordon of Tres records, Warp, Project: Mooncircle etc. want to paint live some canvas to drop them free to the listeners.

The fundamentals of foundational Hip-Hop pulsate vibrantly through the veins of the multi-dimensional artist, John Robinson. Born in the South Bronx and raised in Far Rockaway, Queens, this native New Yorker has sojourned through the underground scenes of New York, New Jersey, Atlanta and Los Angeles for over a decade with the result of creating a sound that is universally magnetic to hip-hop audiences of various backgrounds worldwide. With his Nas-like vocal tone and calm demeanor akin to C.L Smooth, Robinson AKA Lil Sci of the world-renowned east coast group Scienz of Life, rekindles his alter ego to autobiographically introduce to his new chiseled personality that spits nothing less than lyrical perfection. Now is the time for the world to be faced with the question "Who is this man? As Robinson embarks upon introducing his long awaited album, produced and overseen by none other than the Super Villain DOOM. Other Dynamic collaborations from Mr. Robinson include What's the Science? ELEVATION with the brilliant production of Carlos Nino of Los Angeles and also Jay ARE in which Robinson celebrates the history and essence of Jazz music along side Columbus, Ohio's own Producer J Rawls. In recent times John Robinson finds himself building new solid inter-

national relationships working closely with Project Moon Circle based in BERLIN, Germany after just releasing a 7" Produced by Mr. Cooper & Feat. Lewis Parker from the UK. Be sure to check out the latest works of John Robinson and Project Moon Circle which is Scienz of Life's Leviathan full length. With a catalogue that dates back to 1996 it's a definite blessing to the world that John Robinson rhymes.

2econd Class Citizen's music is a hybrid of electronically produced folk rock combined with complex dusty drum-breaks to offer up a wide spectrum of emotive songwriting. Both his EP releases "Divided Reality" and "Wyred Folk" have created a buzz of anticipation from a diverse collection of musical circles and gained him great reviews and quotes from well respected figures in the music scene.

In October/November 2009, his astonishing debut album "A World Without" will be released on Equinox Records from Berlin featuring singer/songwriter Ceschi Ramos from the states and UK based rapper/wordsmith James Reindeer (fbcfabric and reindeer). In addition, a 12" vinyl came out earlier this year entitled "One By One". It features alternate cuts from the album and remixes.

2econd Class Citizen has toured Europe in 2007 with Noah23 and Ceschi and has performed at festivals including Glastonbury (UK) and Soundwave (Croatia). Furthermore, he has shared stages with an eclectic mix of artists including Gong, Ugly Duckling and John Robinson (Scienz of Life). On top of this, he was just recently invited to produce a mix for the Solid Steel radio show (Ninja Tune) which will without a doubt introduce his music to a much bigger audience.

In his live sets he recreates the complexity and depth of orchestration he has become known for, utilising sound editing software with live drum/pad work, to keep a strong improvisational aspect.
